

Τιμές $t_{n,\alpha}$ της κατανομής t_n

Ο Πίνακας δίνει τα άνω α -ποσοστιαία σημεία της κατανομής t με n βαθμούς ελευθερίας

Αν $T \sim t_n$, ισχύει, $P(T > t_{n,\alpha}) = \alpha$. Επίσης, ισχύει, $t_{n,1-\alpha} = -t_{n,\alpha}$

n	$\alpha = 0.1$	$\alpha = 0.05$	$\alpha = 0.025$	$\alpha = 0.01$	$\alpha = 0.005$
